

Chairman Tom Wheeler  
Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

hendrika umbanhowar

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Ben Miller

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

marilyn jenkins

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Renee Koenitzer

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Michael Devoe

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Debra Price

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jerry and Linda Haley

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Courtney Berina

Re: WC Docket No. 14-28 Comments

I donate a substantial amount of the working capacity of my computer to a non-profit organization. They use such computing power to do work on a scientific project, in a system called 'network computing' over the internet. Real concern has been expressed by the leader of this project, that if internet service providers are allowed to prioritize the traffic they carry, they will be able to demand unaffordable fees for access at reasonable speeds. This could mean the end for many non-profit projects on the internet. Please allow strong internet neutrality to exist. Please classify the internet as a public utility. That it is, in fact, if not in current regulatory practice, a public utility, is obvious. It is where people exercise their right to free speech. It is a substantial political, cultural, and scientific forum. That certain interests should be allowed to stifle this forum, in order to increase their wealth, is unthinkable.

Sincerely,

Michael Watson

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mary Carr

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Don Long

Re: WC Docket No. 14-28 Comments

I believe in a free and open internet. I'm just one person, but as an art teacher and free-lance illustrator I depend on my internet connection to quickly reach my agent, my students, and my family. I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. Corporations and the 1% already have an unfair advantage over the rest of us... please don't add a slow internet to our trying to do the best we can. Thank you ! In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jan Cassels

Re: WC Docket No. 14-28 Comments

I believe strongly in the importance of a free and open Internet, I don't believe that this technology, which was created with tax payer money, should be harnessed for the profit of a few. I urge you and the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. The FCC should also reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes and pedestrian lanes which, again would allow the few to use a federally created service for private benefit while ordinary citizens would be penalized.

Sincerely,

Re: WC Docket No. 14-28 Comments

I'm sure you get a lot of these, so let me give you something else to read. (Original text below, because I agree with that too.) The FCC, as far as I am aware, is a part of the government of the United States of America. If it wishes for there to still be a government which can collect taxes to fund itself, it should support Net Neutrality. Here's why: As our technology gets better, the human race needs to do less work. But our societies are still structured around work, so we create jobs that are less necessary for the survival of the human race, but more necessary for the survival of an economy. This is not the way I'd run things, but it's just crazy enough to work. If we still have Net Neutrality. As more jobs move from physical tasks to informational ones, then it stands to reason that whoever controls the flow of information controls the economy. And if you make it legal for corporate entities to restrict the flow of data from and to its competitors, you create an environment that will produce fewer and fewer viable actors. Furthermore, the ones that will be left will be large enough that they will be difficult to tax. The thing is, I suspect you already know this, at some level. And I am certain that there are well paid experts that have told you that the scenario I described above has a billion-to-one chance of happening. But what if they're wrong? If I'm wrong, and things go on as they are, then what is the horrible thing that happens? What problem are we trying to fix by removing Net Neutrality? If you can't answer that question, then what is your foundation for making this decision? I don't expect you to answer those questions to me, but you will be a lot better off in the long run if you answer them to yourself. Thank you, Neal Bohl Original Text: As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

walter zubelik

Re: WC Docket No. 14-28 Comments

Allowing big telecom companies to steer, and direct information will totally negate the validity of all information obtained through access providing companies. It would render the process useless to students, educators, virtually everyone seeking accurate information. This was not the intent, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. I do not understand how you could fail to classify the internet as a public utility, when it has become the ultimate, universal, and global telecommunications service. The internet is truly a public utility -- as it is now constituted, the internet serves the public in the best way possible: being open and available to the public at all times. Why should internet service providers be allowed to use government regulations to advance their corporate self-interest at the expense of the public? Please stop acting in the interests of the internet service providers and instead act in the interests of those you serve: the general public. Please do not adopt your proposed rules allowing the internet service providers to carve up the internet to serve only their profits and corporate self-interest. Instead please act in the public's interest and reclassify the internet as what it is: a public utility and telecommunications service.

Sincerely,

Maureen Dowd

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Dalila Ouáiz

Re: WC Docket No. 14-28 Comments

I am a web developer, and I believe that Net Neutrality is essential for free speech and democracy. By eliminating Net Neutrality, innovation based on internet technology will be in jeopardy. Great ideas come from large and small voices on the internet. Developers with great ideas might not have the wallet power to compete with larger firms for "fast lane" access to customers and therefore will be at a disadvantage. Providing a "fast lane" for customers is no different than enforcing a "slow lane" on content firms who can't pay up and will kill Net Neutrality. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Philip Gantt

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Carlene Dodson-Malikt

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Montell Qualls  
1714 Cedar Creek Court  
Grove City, OH 43123-1682

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Ella Clee

Re: WC Docket No. 14-28 Comments

Wheeler, YOU recently proposed rules that would allow Internet service providers (ISPs) to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. If adopted, these rules would amount to nothing less than the corporate takeover of the Internet and the death of Net Neutrality. YET, yesterday, July 12, 2014, you sent ME an e-mail that states, AND I QUOTE:" I'm a strong supporter of the Open Internet, and I will fight to keep the internet open." Which is it, Wheeler? YOU profess to be in favor of an "Open Internet", YET YOU, yourself, proposed rules that would do just the opposite. As the Native Americans used to say...white man speak with forked tongue. You, sir, are a liar and NOT WORTHY of your position as Head of the FCC. I DEMAND you recuse yourself from this decision and IMMEDIATELY resign your position. I DESPISE people who say ONE thing, THEN disgrace themselves with their very own actions to the contrary of what they profess. Net Neutrality is important because the Internet is an essential service Americans rely on to conduct our most basic daily affairs, from applying for a job to finding a home, to running a small business. And our right to communicate freely and be heard lies at the heart of our ability to participate equally in our democracy. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Guy Barnes

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jeff Fayle

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

William Boone

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Cary Green Sr

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. I just lost a job teaching online graduate classes because the Internet service is too slow, too often interrupted, for me to upload the necessary documents. That is crazy! Yes, I have so-called high speed broadband cable Internet and G4 mobile hotspot, but neither is high speed in Montana. I pay through the teeth, but I don't get what I pay for, and that lousy service just cost me a job! In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. It is very clear that the Internet is far more a public utility than phones ever were. If you have a smart phone or use a PC at home, you know this is true. The FCC should also reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. That's merely the "camel's nose under the tent" allowing corporations to end our equal access to this important public utility, the Internet.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Sandra Britton

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Rebecca Phillips

Re: WC Docket No. 14-28 Comments

Do your damn job and work for the public. You hold a federal position and your salary is paid by the citizens. Do not kowtow to corporations. The public is fed up with corporations dictating how we live. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Doing so sets a dangerous precedent that will worsen the digital divide between the information-haves and the information-have-nots, increase the cost of access to online education, and erode our right to free speech by putting it in the hands of for-profit corporations that are not bound by the U.S. Constitution.

Sincerely,

Nancy Hancock

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mathey mathey

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Paige Smith

Re: WC Docket No. 14-28 Comments

Please reclassify the Internet as a public utility. The Internet has become an essential service that nearly all Americans rely on for business as well as personal uses. To divide the Internet into fast lanes and slow lanes will be a huge disadvantage for those who cannot afford the fast lane. And that's not only unfair, it's unAmerican! Please stop the rules that allow for fast lanes and slow lanes. Please reclassify the Internet as a public utility. Please give us Net Neutrality Now.

Sincerely,

Sally Stephens

Re: WC Docket No. 14-28 Comments

What will happen if you do not preserve net neutrality? The wealthy few will buy fast access and enjoy doing whatever they want to do. The rest of us will get bogged down by systems that have become a new version of cable TV. We already have cable TV. What we need is the internet. The internet goes way beyond just delivering video to people. It is a way to explore the world. It is a way to get news not available elsewhere. It is a way for people around the world to meet and greet. Allowing tiered access will mean that those applications, mainly commercial applications, that can afford to pay the fee for access will take over and the internet will become a commercial gateway to hell where all we can manage to connect to with any decent speed is the same tripe they presently serve us via cable. Do not let this happen. Please.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, and someone that views the Internet as the most important technical innovation in active citizenship and as a platform for economic entrepreneurship, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations who will pay higher broadband rates per byte delivered, and slow lanes for the rest of us and for the entrepreneurs that are starting the key online services which will be one engine of economic innovation for the United States during the 21st century. This is not the time to allow Korea, Israeli, Finish, Japanese, Chinese and other countries to pioneer these services because only the US handicaps ourself with this multi-tiered pricing system.

Sincerely,

Robert J Schloss

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Judy LAFRANCE-ZWACK

Re: WC Docket No. 14-28 Comments

Keep the internet free, fair and open. No special deals for certain service providers. A level playing field is required of all us internet users. Reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Steve Duval

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Claire Crishon

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Marcia Bernstein

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

jeremy hamilton

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

John Akins

Re: WC Docket No. 14-28 Comments

Corporations are already dominating our Internet experience. Facebook, Amazon, Google, and the rest have monopolized content and continually employ intrusive methods to control content and marginalize smaller enterprises. Giving greater control and access to corporate behemoths seems decidedly un-American.

Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Marshall Kaufman  
60 W. 68 St.  
New York, NY 10023-6020

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Stop putting lobbyist's and big corporations interests before the American people's. It's disgusting how much influence corporations have on regulatory issues. Maybe Obama shouldn't have appointed a former lobbyist as the FCC chairman. Tom Wheeler is a puppet who is destroying the sanctity of the Internet for his own personal interests. Again, I'm disgusted. Can't wait until I graduate because I'm out of this corrupt country to places where real net neutrality exists.

Sincerely,

Mitch Stehlin

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Charles M. Thomas

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

John Kindig

Re: WC Docket No. 14-28 Comments

America is truly becoming "Corporate America." Please stop this! Every entity as we know it is focused on greed and profit by large corporations. We are headed toward a distressed nation with a class system, one of a very small wealthy class and a large poor class. How very sad. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

LAURENCE VALLE

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

janice L arnold

Federal Communications Commission  
445 12th Street, SW  
Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Mackenzie Burke

Re: WC Docket No. 14-28 Comments

Dear FCC [7-13-14]: I'm a cancer patient who can barely afford the Internet while on S.S. [only income]. I need to communicate daily w/MDs, PNs, RNs & lab techs re my health. If ISPs force me to take a slow lane--because FCC Commissioners hate the Middle Class--you will kill me quicker by grabbing the little time I've left as Stage IV. Pls don't give the 1% more favoritism--they have enough, chris summerhill chris0summerhill@gmail.com

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Brad Frederick

Re: WC Docket No. 14-28 Comments

Broadband Internet access is in fact a telecommunications service. Some private interests want the FCC not to classify it that way, so they can do exactly what the laws and regulations were designed to prevent: take over a universal resource and manipulate for their private profit and to suppress anyone who disagrees with them. Be honest. Classify broadband access as what it is, a telecommunications service. Serve the public, not private corporations who are trying to take over the Internet. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Philip Terrell Terrell Jr

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Frederica R Mull

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Today, the Internet is the main place on which people can exercise their freedom of speech. Establishing "fast" and "slow" lanes will limit this free speech. As a main mechanism for the exercise of free speech, the Internet must be reclassified as a public utility.

Sincerely,

Kevin Peterson

Re: WC Docket No. 14-28 Comments

The internet needs to be accessible and open to all.... By what right, other than greed and quest for power, must it lie in the hands of corporations???? Clearly another step toward a fascist society and ultimately a revolution.... As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Kenneth Jacks

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Matthew Hilder

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jim Barritt

Re: WC Docket No. 14-28 Comments

Allowing cable companies to control communication in the US is a clear violation of the spirit of the US Constitution. We need freedom of speech and access to speech. Giving priority to the highest bidder violates that right. ALL PEOPLE NEED TO BE HEARD. MAINTAIN NET NEUTRALITY!!!

Sincerely,

John Cooper

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Rashad Christopher

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Keith Jackson

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

jean filipek

Re: WC Docket No. 14-28 Comments

The internet is a very important means of open communication and shouldn't be divided up so that some corporations can make more money. It's just so wrong to do that. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

I once was an ISP, and CEO of a telephone company, a small CLEC. It was the common carrier aspects of the 1996 Telecommunication Act which gave rise to the Internet and DotCom boom. Suddenly, anyone with the knowledge and expertise could provide services that the telephone company wouldn't. The telephone companies could've always provided dial-up access to the Internet, but they didn't. Dial-up concentrators and routers pre-date 1996. Why, in the face of shouts of demand, didn't the telephone company provide dial-up back then? The only reason you even know the name of AOL is because the telephone companies steadfastly did not provide dial-up Internet access, and were forced to carry such traffic under the 1996 act, under protest. So here we are again. If Internet traffic were properly classified, and open to true competition, hundreds or perhaps thousands of new companies would be formed within a year. The solution is history repeating itself: classify broadband Internet access as a telecommunications service. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Bill Baum

Re: WC Docket No. 14-28 Comments

I believe in a free and open Internet- the FCC should reclassify broadband Internet access as a telecommunications service for Net Neutrality. The FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. This would be an undemocratic subsidy for corporations!

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Nancy Stafford

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Sarah Rose

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Julie Ann Myers

Re: WC Docket No. 14-28 Comments

As an Internet user with hundreds of university students and colleagues who rely on fast Internet service, I believe strongly in the importance of a free and open Internet. I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In this electronic age, Net Neutrality is a democratizing service. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. In so doing the FCC will service the interests of the American people as a whole -- a democratic concept.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

I am but one person and so don't know the significance of my comments but I feel the need to speak on it nonetheless. The internet is an important symbol of the freedom of humanity and it should not be compromised for corporations which do not represent the long term interests of humanity or life on this planet. Regardless of what written law says corporations are not people

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Linda Kurkowski  
19208 Liberty mill Road  
Germantown, MD 20874-1420

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. Though you have been a lobbyist for cable companies, as a recently appointed Chairman of the FCC (with impressive credentials), it becomes your responsibility to lead the FCC in impartiality and fairness, i.e. net neutrality. It is my sincere hope that you will fulfill this responsibility and be a leader in restoring the public trust. Such leaders are in short supply these days.

Sincerely,

Carroll Heins

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. This action could also affect worker productivity and efficiency in smaller companies, an unfair hardship at best.

Sincerely,

Patricia Boatright

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

James Fenolio

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Lisa Talev

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Victor Eisenberg

Re: WC Docket No. 14-28 Comments

The digital age requires internet service be viewed as a public utility and kept out of the hands of an oligarchic few. As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Sharon-Frances Reynolds

Re: WC Docket No. 14-28 Comments

Why does everything have to be changed to give additional benefits to people or corporations (who are like people, we are supposed to believe, according to the Supreme Court) just because they have the ability to get the attention of our lawmakers and/OR bureaucrats and then to sway these same functionaries who should remember "we, (all NOT some of) the people" are the ones who should come first in any deliberation, decision or consequences of that decision. I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. Also keep the Internet accessible and functional for everyone. Why do wealthy persons or huge corporations deserve Internet priority over people such as these: - a third grader researching a history project; - a new Mom who is looking for tips to help her baby sleep through the night; - a long-laid off worker searching for educational opportunities on a computer at a public library; - a small county History Center in rural -northern Minnesota seeking access to information available on the State of Minnesota's larger databases; - a student in college writing a last minute research paper; - and on and on and on with stories of people trying to manage as well as they can in their busy daily lives. Government is for everyone, but it is very apparent that no matter what party is in power, politicians and/OR bureaucrats in Washington, D.C. no longer work for the Public Good when their ears are always listening to Big Bucks corporations and glib-talking lobbyists or the people who consider themselves more privileged than others because of their wealth and/or position in life. I'm going to stop because as I write this I am so tempted to abandon any rational arguments and just holler at all of you. "When the revolution starts, I will also be out in the streets!" (Sorry ....) Susan Downing 2130 Scheffer Avenue Saint Paul, MN 55116

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Elisabeth Aguilar

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Carven Lumang

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Gary Walker

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Jennifer Stratton

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Chelsey Ballot

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

sarah brownrigg

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. I have been online since 1999. I have watched the Internet grow where today it is an integral part of my life. The internet is a revolutionary invention that has become essential to everyone who lives and uses this media. And, now, Big telecommunication companies like AT&T, Verizon, Comcast, and Time Warner want to change the way the internet has always functioned by creating "fast and slow lanes" so they can extract more money from everyone. If this happens, you will be taking away the free market that we now all enjoy. Please don't let this happen if you do it may be irreversible.

Washington, DC 20554

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Deborah Kelly

Re: WC Docket No. 14-28 Comments

As a teacher, the internet is a valuable tool for instruction and practice. To have an internet where there is not equal access is to restrict opportunity and provide an unfair advantage to some. The internet is the information highway. We are all entitled to the same access to this information. It should be one's willingness and effort that should determine how quickly they are able to obtain information. This should not be determined by what is in their wallet or bank account. We already have a divide between the have's and have not's. You are taking away a tool that may help someone create a small business or help them compete in a market economy. It should be unconstitutional to make laws that are prejudice and bias in nature. I believe if this takes effect it should be challenged in a court of law!

Sincerely,

Michael Stephen Moody

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

shahram Arshadnejad

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

parker larsen

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Lisa Raines

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Lonnie Roth Fairchild

In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us. I use the internet everyday for work and entertainment, both. Being able to find all the sites I need when I need them and as quickly as everyone else should be able to is important. There are not many competing internet providers in a given area, so allowing them power of choosing who gets fast and slow service is not something that will help anyone who isn't those companies, thus hurting the overall economy.

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Viktor Zavadsky

Re: WC Docket No. 14-28 Comments

As an Internet user who believes strongly in the importance of a free and open Internet, I urge the FCC to reclassify broadband Internet access as a telecommunications service, and save Net Neutrality. In addition, the FCC should reject the proposed rules that would allow Internet service providers to divide the Internet into fast lanes for wealthy corporations and slow lanes for the rest of us.

Sincerely,

Peggy York
